PLC Programming using CODESYS

CODESYS is a commercial PLC programming tool and real-time software platform for PLCs and embedded controllers.

CODESYS provides

- support for IEC 61131-3 programming language standard plus extensions
- fieldbus support: EtherCAT, CAN bus (CANopen, J1939,..), Modbus, ProfiBus,...
- IoT connectivity

IEC 61131-3 standard for programming languages for PLC is a global standard so that End-Users do not have to learn a Supplier specific different PLC programming environment every time they change a PLC supplier.
